INFORMATION REQUESTED ON UST 56 (GWPD 17623)

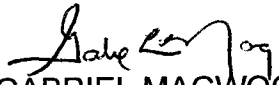

Dear Mr. Bristol:

After reviewing the Assessment Report, you requested that the procedures for final closure of the UST 56 tank vault be provided for your review. The following is a brief description of the area and plans to close the tank vault:

The vault is between two buildings, the surface area surrounding it is concrete and asphalt. Rainwater runoff is channeled between the buildings and through the area so the use of soil to fill the concrete vault was inadvisable. Instead, the vault was filled with angular rock. Contracts are being negotiated for asphalt paving of several sites at the Naval Base Complex. Once the paving contracts are in place, the UST 56 vault will be covered and paved.

If there are any questions please contact me at (803) 820-7307.

Sincerely,

  
GABRIEL MAGWOOD  
Petroleum/UST Branch
